

PRODUCT ROADMAP

What We've Built · What's Next · The Full Vision

April 2026 · Confidential — Founder Copy

CURRENT STATE — WHAT'S LIVE

14	3	0	0
Features Live	Paying-Ready Academies	Direct Indian Competitors	Revenue (Change This Now)
■ Role-Based Login	Coach / Athlete / Parent / Admin with sport-specific scoping		
■ 14-Day Trial Gate	Auto-expiry on registration, backend + frontend gated		
■ Wellness Check-in	Daily 4-metric check-in (Energy, Sleep, Soreness, Mood)		
■ AI Engine (ACWR)	Readiness score, injury risk, deception flagging via Groq		
■ Coach Dashboard	Live squad view, 30s refresh, per-sport locking		
■ Bulk Session Logger	3-step squad logging in under 3 minutes		
■ Session Planner	AI-generated full session plan with squad modifications		
■ Parent Broadcast	WhatsApp deep-link with AI insight, 1/day rate limit		
■ Recovery Broadcast	Red-zone athletes get AI home exercises via WhatsApp		
■ Parent Portal	Read-only wellness, AI message, home recovery advice		
■ Mental Performance	5 guided breathing + visualisation exercises		
■ Injury History Log	Coach logs, athlete reads, parent sees active injuries		
■ Athlete Self-Profile	Parent name + phone completion on first login		
■ Soft Delete	Athletes archived, data preserved		

PHASE 1 — REVENUE UNLOCK (Do This Month)

Nothing else matters until money can come in. These are the only features that convert a trial user into a paying customer.

Feature	Why It Matters for Indian Academies	Effort	Priority
Razorpay Payment Gateway	Trial expires → payment page → ₹1,999/mo Pro plan. Without this you cannot earn a single rupee regardless of how good the product is.	Medium	■ NOW
Upgrade Flow in App	AcademyProfile page currently shows "Contact us via email". Replace with direct Razorpay link. One tap to upgrade.	Low	■ NOW
Post-Payment Plan Activation	Webhook from Razorpay updates plan = "paid" in Supabase automatically. No manual intervention needed.	Medium	■ NOW
Founding Coach Pricing Banner	Show "₹999/mo locked for life — first 10 academies only" on the login page. Creates urgency for early signups.	Low	■ SOON

PHASE 2 — RETENTION FEATURES (Next 2–4 Weeks)

Features that make coaches feel AthleteIQ is irreplaceable. The goal is that leaving the platform means losing months of data and insights.

Feature	Why It Matters for Indian Academies	Effort	Priority
Weekly Auto-Report (Monday)	Every Monday, coach gets a WhatsApp/in-app summary: who improved, who declined, injury risks, top performer. Zero effort from coach.	Medium	■ HIGH
Sport Dashboard Page (/sport/:sport)	"Full View →" button already exists in Dashboard but leads to a blank page. Fix this — sport coaches need their own clean view.	Low	■ HIGH
Attendance Tracker	Simple present/absent per session. Coaches in India track attendance manually in notebooks. This replaces that habit immediately.	Low	■ MED
Match / Competition Calendar	Coach adds upcoming match date. App auto-adjusts session plans (match_today / match_tomorrow logic already built in AI).	Medium	■ MED
PDF Session Plan Export	Coach can download today's AI session plan as a PDF to share with assistant coaches. Used by every serious academy.	Low	■ MED
Injury → ACWR Cross-Reference	When an injury is logged, check if ACWR was above 1.4 in the 7 days prior. Show this pattern to coach. Genuinely powerful insight.	Medium	■ MED

PHASE 3 — GROWTH FEATURES (Month 2–3)

Inspired by global platforms like Catapult, Hudl, TeamBuildr, and PlayerTek — but stripped down for Indian coaches who have zero time for complex software.

Feature	Why It Matters for Indian Academies	Effort	Priority
RPE Trend Chart per Athlete	Simple line chart: coach-logged RPE over time vs athlete self-reported soreness. Catapult charges ₹5L/year for this. You can do it free.	Low	■ MED

Feature	Why It Matters for Indian Academies	Effort	Priority
WhatsApp Business API	Replace the current deep-link workaround with real automated sends. Messages go out without coach tapping anything. Meta charges ~₹0.78/msg.	High	■ LATER
Multi-Coach Academy Support	Head coach sees everything. Assistant coaches see only their assigned athletes. Already partially built via sport scoping.	Medium	■ MED
Athlete Performance Score (0–100)	Single weekly score combining wellness trend + training consistency + ACWR. Parents understand one number. Coaches compare across squad.	Medium	■ MED
Check-in Reminder (WhatsApp)	If athlete hasn't checked in by 10am, auto-send a WhatsApp reminder. Drives daily habit. Similar to how Strava sends nudges.	Medium	■ MED
Drill Library (Coach-Saved)	Coach can save favourite AI-generated drills to a personal library. Reuse them in future sessions. Inspired by Hudl's play library.	Low	■ LATER
Parent App Notification	Push notification to parent when child's readiness drops below 50 or injury is logged. Currently only WhatsApp manual send.	High	■ LATER
Hindi / Marathi Language Toggle	Most Pune local coaches speak Marathi. Even just translating the parent portal and WhatsApp messages would be a massive differentiator.	Medium	■ MED

PHASE 4 — SCALE FEATURES (Month 4+, Post Revenue)

Only build these after you have 10+ paying academies. These features justify the Elite tier pricing and open up institutional sales.

Feature	Why It Matters for Indian Academies	Effort	Priority
Multi-Academy Admin Dashboard	One login to manage multiple branches of the same academy. Needed for chains like KIVA, JSW, or franchise sports schools.	High	■ LATER
Video Drill Uploads	Coach uploads a drill video, athletes watch it before practice. Inspired by Hudl. Storage cost is the main constraint.	High	■ LATER
Academic + Sport Balance Score	For school sports programs — tracks if athlete's school performance is affecting training. Unique to Indian context.	Medium	■ LATER
Coach Analytics Dashboard	How many sessions planned, what % of athletes improved week-on-week, injury prevention rate. Makes the ROI case to academy owner.	Medium	■ LATER
API for Wearables (basic)	Accept data from budget wearables like Mi Band or boAt. Indian athletes can't afford Garmin. Even step count + HRV helps ACWR.	High	■ LATER
Nutrition Log (Simple)	Athlete logs: "ate well / average / poorly" after each session. No macro counting. Just a wellness signal for the AI engine.	Low	■ LATER

COMPETITIVE LANDSCAPE — WHERE ATHLETEIQ WINS

Platform	What They Do	Price	AthleteIQ Edge
Catapult	GPS wearable load monitoring for elite clubs	■5L+/yr	90% cheaper, no hardware needed, works on any phone
Hudl	Video analysis and performance for US/EU sports	■2L+/yr	India-first, Hindi support, local sport focus (Kabaddi, Cricket)
Sportzy / SpynPRO	Indian academy admin + billing tools	■500–2k/mo	Zero AI, zero wellness tracking, zero parent insights — completely different product
TeamBuilder	US strength & conditioning program builder	■3k+/mo	Built for Indian field sports, not gym-based S&C; programs

RECOMMENDED PRICING STRUCTURE

Tier	Monthly	Annual	Athletes	Target
■ Founding Coach (First 10 only)	■999 locked for life	■9,990	Up to 50	First beta coaches — reward early trust
■ Pro (Main Tier)	■1,999	■19,990 (2 months free)	Up to 50	Established academies, your primary revenue
■ Elite (Future)	■4,999	■49,990	Up to 120	Multi-sport academies, institutional sales only

30-DAY ACTION PLAN

Week	Build	Business Goal	Success Metric
Week 1	Razorpay integration + upgrade flow in AcademyProfile	First ■1 of revenue	Payment link live and tested
Week 2	Sport Dashboard page + Weekly auto-report	5 beta academies onboarded	5 coaches using app daily
Week 3	Attendance tracker + PDF session plan export	Convert 2 free → paid	■3,998+ MRR
Week 4	Match calendar + injury-ACWR cross-reference	First testimonial + referral	1 academy refers another

NORTH STAR METRIC

Every local Indian sports academy should be able to run like an elite performance centre without hiring a sports scientist. AthleteIQ is the sports scientist in their pocket — affordable, simple, and built for coaches who have 20 athletes, a WhatsApp group, and no time.

12-month target: 50 paying academies across Pune · ■1L MRR · Zero churn
